

The Genii of the Presence

The influences of the energy of the Planetary Genii (or Genii of the Presence), are more powerful than the astrological influences of the planets. Knowledge of this subject led the Chinese Sages to say, *"The star leads the fool, but the wise guides his star"*.

Indeed, if we want to perform work in connection with one of the outer planets, such as Jupiter or Saturn, we may have to wait for quite a long time for their respective aspects to give a favorable configuration. By contrast, working with Planetary Genii very rarely requires a wait of more than a week. Moreover, it is easy to separate the positive from the negative aspects of these planetary energies.

To better understand the action of the Planetary Genii, it must be remembered that planets, like all of creation, consist of a physical body and a non-physical (or spiritual) body. The physical body (living) of the planet is the basis for the study of astrology. The spiritual body, invisible to the world, is the basis for the action of the Planetary Genii. The invisible body of the 7 planets resonate with the 7 levels of the Invisible in each of us. Thus, the Planetary Genie of Saturn - or the spiritual energy of Saturn - by giving us the energy emanating from the Primordial Energy attunes Level 3 of our own inner structure. It is the same for other planets and our other levels.

(Note: the physical and spiritual aspects of the planets were developed by Jean Dubuis in his full length course, The Experience of Eternity).

We stated in the article on "Numerology in the Universe Cycles" that during the Equinoxes there are twelve hours of daylight between sunrise and sunset and twelve hours of night between sunset and the sunrise.

But this is not so the rest of the year. In summer, days are longer than nights, as each day hour of "action" of Planetary Genie is longer than the time of night "action". Conversely, in winter day "action" times are shorter than the night "action" hours. This is because each Genie acts in turn on a "slice" of a twelfth of day and a twelfth of night.

In principle, the action of the Planetary Genie following the sunrise has priority that day: it will be, therefore, the most powerful. This does not prevent you, in an emergency, to use another Genie at another time of day. But there are incompatibilities in this case :

- **Saturday**, day of Saturn, it is better not to use Jupiter or Mercury.
- **Sunday**, day of the Sun, do not use Mars.
- **Monday**, day of the Moon, no hostile planet.

- **Tuesday**, day of Mars, do not use the Sun.
- **Wednesday**, day of Mercury, do not use Saturn.
- **Thursday**, day of Jupiter, do not use Saturn.
- **Friday**, day of Venus, no hostile planet.

By contrast there are favorable combinations:

- **Monday**, Mercury is in sympathy.
- **Wednesday**, Moon and Sun are in sympathy.
- **Friday**, the Sun is in sympathy.

If during the day "action" hours, the energy radiated by the Planetary Genie is positive, then the energy radiated at night is negative.

Night "action" hours remain under the influence of the Planetary Genie of the day, but the first Genie of the night acquires some strength. Therefore:

- **Night from Saturday to Sunday** begins with Mercury opposed to Saturn; the negative aspects of the night will be powerful.
- **Sunday to Monday night** begins with Jupiter, indifferent to the Sun, Jupiter is a little sun, somewhat akin to the son of the Star of the day.
- **Monday to Tuesday night**, no particular negative effect.
- **Tuesday to Wednesday night**, starts with Saturn above Mars in the Tree of Life. The negative aspects of the night must thus be weakened.
- **Wednesday to Thursday night** starts with the Sun. The Mercury-Sun sympathy and the Paths of the Tree governed by these two planets give this night a great importance in psychic and spiritual achievements.
- **Thursday to Friday night**, presided by the moon and under the influence of Jupiter, facilitates contact of the lunar world, Astral of Yetzirah.
- **Friday to Saturday night**, presided by Mars, the complement of Venus. It is the night of Good Friday, the night where the combined elements of Venus and Mars prepare for the Initiation Test.

It is in the yetziratic text that we can better understand the functions of each Genie, and therefore can select the one needed for meditation or for operating towards a specific purpose.

- **Saturday**, Saturn, meditation or actions must concern peace and conflict reduction. The day of Saturn is favorable to authority. At night, Saturn promotes conflict, but it can be used to diminish authoritarianism. The day Genie of Saturn is favorable to respiratory organs, especially the nose.

- **Sunday**, the Sun promotes physical and spiritual fertility. It is a powerful element of harmony. Sunday is particularly favorable to charge the blood with Solar Fire (Prana).

- **Monday**, the Moon. Its Planetary Genie is the transmitter of all astral energies. It can open the door to the Wisdom of the other world. Meditation, at these times, is favorable for either the perceptions of psychic vision, or for contact with the memories of Nature.

- **Tuesday**, Mars. This Planetary Genie gives strength, power and wealth but also in its negative aspects, pride. It is very favorable for the treatment of blood by auriculotherapy acupuncture.

- **Wednesday**, Mercury, favorable to occult or mystical power, alchemical or magic achievements. Its negative aspect is essentially intolerance. It is particularly favorable to the transformation of speech into the Word, and clairaudience.

- **Thursday**, Jupiter, favorable to beauty, to esoteric or metaphysical questions, favorable to assimilation organs, either intellectual nourishment or physical food. Religious intolerance is its main negative aspect.

- **Friday**, Venus is the planet of Life, birth or rebirth through initiation, intimate contact with the plant realm. Its negative aspect is lust. Venus can open the psychic eye to the Signatures of Nature.

To use these energies it is best to possess an oratory for simple meditation, meditation done preferably in the middle of the hour of the Planetary Genie. Other methods cannot be the subject of this presentation because process, precautions, and safety rules to apply form a text which occupies several chapters in the Qabala lesson.
